

i am a over the road truck driver and the availibility of instant traffic and weather is very helpful in my daily routine. in the past while listening to regular radio i would only b able to get traffic information at prime time in the morning and evening , with xm i can get it any time i am traveling thru that particular city wether it is 4am or 1pm. during my days and/or nights driving across this great nation i am 100% more informed and feel 100% safer now that i have the xm instant weather and traffic .
